

LMU

Lincoln Memorial University

VALUES • EDUCATION • SERVICE

Fall 2026

Course Information

Number	NURS 733
Title	Advanced Anesthesia Pharmacology II
Delivery Method	Hybrid / Synchronous Lecture
Section	AO
Time and Place	Monday 13:00 – 16:00 (EST)
Credit Hours	3

Instructor Information

Name	Matthew Roberts, DNAP, CRNA
Email	Matthew.roberts@lmunet.edu
Phone	205-602-6470 (Cell)
Office Location	Remote – Off Campus
Office Hours	Tuesday 1000 – 1200 (Link) Wednesday 1000 – 1300 (Link) Thursday 1000 – 1200 (Link)
Email Response Time	24 Hours During Normal Business Hours

Name	Raleigh Todd, DNP, CRNA
Email	Raleigh.todd@lmunet.edu
Phone	423-869-6282
Office Location	MANS 223 Remote – Off Campus
Office Hours	Monday 0800 – 0900 (Link) Tuesday 0800 – 0900 (Link) Wednesday 0800 – 1100 (Link) Thursday 0800 – 0900 (Link)
Email Response Time	24 Hours During Normal Business Hours

Course and Program Specific Information

Course Description

The course builds upon principles of general pharmacology, with an emphasis on clinical pharmacology, including the pharmacokinetics and pharmacodynamics of medications commonly used in the practice of anesthesia. The principles of managing monitored anesthesia and conscious sedation are introduced. This course will also include fluid and blood management, as well as anesthesia effects on hemodynamic parameters, with appropriate interventions.

Pre-requisites: All Spring I and Summer I Nurse Anesthesia Courses

Co-requisites: NURS 701, NURS 741, NURS 753, NURS 753-A.

Course Objectives

Upon completion of this course, the student will be able to:

1. Compare and contrast pharmacokinetics and pharmacologic principles of inhalation anesthetic agents, intravenous anesthetic agents, neuromuscular blocking agents, parasympatholytic drugs, and local anesthetics commonly used peri-operatively.
2. Apply pharmacokinetics and pharmacodynamics principles to the practice of nursing anesthesia.
3. Incorporate concepts of anatomy and physiology to synthesize pharmacokinetic, pharmacodynamic, and pharmacologic principles of anesthesia drugs for the patient undergoing anesthesia.
4. Predict the continuum of the depths of sedation.
5. Incorporate basic, translational, and clinical research-based knowledge to the development of appropriate pharmacological treatment modalities used in anesthesia delivery.
6. Devise an anesthesia pharmacologic care plan for deep sedation.
7. Devise an anesthesia pharmacologic care plan for general anesthesia.

Texts/Materials for the Course

Required

1. Flood, P., Rathmell, J. P., & Urman, R. D. (Eds.). (2022). *Stoelting's pharmacology & physiology in anesthetic practice* (6th ed.). Wolters Kluwer.
2. Elisha, S., Heiner, J. S., & Nagelhout, J. J. (2023). *Nurse anesthesia* (7th ed.). Elsevier.

Supplemental

1. Valley / Prodigy Learning Modules and Memory Master

****Other readings may be required throughout this semester, along with articles and or websites. This will be announced or posted in Canvas by your instructor for that unit.**

Course Requirements, Learning Outcomes, and Evaluation Methods

A. Canvas Learning Management System

1. Canvas is the learning platform used for all courses. Students must have proficient computer skills necessary to participate in the course.
2. Canvas modules for the week will contain the required readings, learning materials, as well as any assignments for the week.
3. Students are required to log on to the course Canvas site on a regular basis and participate **in discussion board** (if applicable) and complete any assignments, quizzes and exams by the due dates as assigned.
4. Instructors will monitor frequency and timeliness of student access to the course shell and its components.
5. Course announcements along with LMU email should be checked at least daily.

B. Attendance Requirements

Synchronous Online

Attendance for a synchronous online course is mandatory. The class will meet on ZOOM at its assigned course time (unless otherwise announced by the faculty). Students are expected to be in the virtual platform on time and for the duration of the class with their camera on as well as have the ability to use their microphone if needed. Attendance will be taken at every course meeting. To be counted present, the student must be present for the entire class period.

Any unexcused lecture absence will result in a **2% reduction** of the final course grade for each recorded absence.

C. Course Requirements/ Assignments

1. Students must complete all scheduled assignments by the assigned due date as posted in the course schedule in the syllabus or within the learning module for the assigned week. Failure to submit assignments, quizzes, exams, or participate in required activities will result in a zero.
2. Detailed instructions for any assignments, quizzes, exams, and activities are located in each learning module.

D. Tests and Examinations:

All testing in graduate nursing courses is performed via the online testing platform in Canvas using Respondus Lockdown browser.

ONLINE EXAM ADMINISTRATION POLICY

All students are expected to take exams as scheduled.

1. Technical requirements:

- Technology is an essential and integral part of online testing. The student must have a laptop computer no more than 2-3 years old on a stable connection to a high-speed internet during online examinations. A webcam

and microphone are also required. Browsers should be kept up to date and tested to ensure the student has the necessary browser capabilities for exam purposes. All exams will be given via online LockDown Browser unless otherwise specified in the course syllabus.

- **Note: Tablets, iPads, and some Notebooks are not compatible with the online testing platform; therefore, these devices are not allowed for taking examinations. It is the responsibility of the student to obtain an alternative device if the personal device does not work.**
2. **If unable to complete or take the exam:**
- Students must notify the faculty by phone or email (see Faculty Contact Information) prior to the scheduled exam if they cannot take an exam (for reasons of sickness, etc.). Students are given faculty contact information in each NURS course syllabi and are expected to always have it available.
 - If for any reason a student is unable to leave a message for the faculty member via the contact information provided, it is the student's responsibility to contact the Nursing Office in Harrogate (1- 800-325-0900, ext. 6324) or the appropriate site location and talk to an administrative assistant or leave a message on the voice mail. Please remember to state you are unable to take the exam and be specific as to the course, the faculty's name, and the site you attend. Any student that does not notify the appropriate faculty may receive a zero for the exam.
 - Faculty will determine the date, time, and method of any alternative make-up exam. A pattern of missing exams in a specific course or throughout the program will not be tolerated. A counseling record will be written with each missed exam, and the specific consequences of another missed exam will be provided. If the student does not make up the exam on the scheduled date and time, the student will receive a zero on the exam.
3. **During the exam:**
- At LMU, the primary and preferred method of verification of a student's identity for online education is the use of your username and password and student ID.
 - Please be sure you have the Respondus LockDown Browser installed (Instructions for download on the Canvas site-must be LMU version) on your device, a webcam, and LMU ID available prior to the exam start time.
 - **You may have a small white erase board, dry erase pen, & dry marker eraser. You will be prompted to show this before and after the exam. There is a built-in calculator on the Lockdown Browser if needed.**
 - Prior to beginning the exam, you will be asked to perform several tasks – picture of yourself, picture of your LMU ID, and an environmental scan. When you are asked to do these, please ensure you:
 - i. are forward facing to the computer/webcam.
 - ii. show both your face and ID at the same time when doing the ID photo, and while doing the environmental scan:
 - 1. **move slowly while videoing the area, show your entire desk, computer screen, the area behind the computer, and the area on both sides and behind your seat, and you will also need to video both sides of your dry erase board, pen, and eraser before you begin the exam and again at the end of the exam, use a mirror to video the computer screen, showing both sides of the mirror during the environmental scan.**

iii. **Failure to record all areas of the environment will be considered a violation of the Academic Integrity Policy and may be subject to dismissal.**

- The exam will be timed. Once the ID verification and environmental scan is completed the exam timer will begin. You will have only one opportunity to enter and complete the exam.
- **If you should run into technical difficulties during the exam, speak to the camera and say that you are using your phone to contact the instructor or the help desk.**
- Videos will be reviewed and any suspicion of cheating will be investigated.
- Student questions related to exam content will not be answered by faculty during the exam.
- Students are not to talk or communicate with another person during the exam. If talking/communication occurs, the students involved will be subject to the University's cheating policy.
- The student is prohibited from sharing any information with any other individual or student in written, verbal, electronic, photographic, or other format at any time during the exam period or the semester. Sharing of any quiz or exam information will be considered a form of academic dishonesty/cheating and will follow the disciplinary proceedings described in the Graduate/ Undergraduate Student Handbook. The instructor reserves the right to investigate any potential sharing of information in the above format anytime during the semester.
- Cell phones, smart watches, or any electronic devices usage are NOT permitted during online course time. This includes taking photos of the material, sending, and receiving text messages. No hats are allowed while testing. No blankets or throws are allowed while taking the examination.

3. **After the exam:**

- An item analysis of all questions is completed before the exam grades are determined and released.
- You may review your exam according to the specific program policies.
- Individual exam reviews will not be granted unless a student scored below 82.5% on the exam. A faculty member may choose to conduct an exam review with the entire class. If a class-wide review is held, the following conditions apply: the review may not be recorded, and the discussion must remain focused on concepts that were commonly misunderstood or missed.
- Questions concerning exam questions will be accepted according to the specific program policy.
- Nursing faculty will have one week to review and score exams. Individual student grades will be available and posted on Canvas within one week after the exam has been given.
- Faculty reserves the right to correct any clerical error. This includes both increases and decreases to adjusted exam grades.
- Students have one calendar week after the test results are posted to contact their instructor for review of results.
- At no time will a student be left alone to review a previous test.
- For the last exam of the semester (final unit exam or final comprehensive exam), students must contact their instructor within 24 hours to schedule review of exam results. In order for faculty to consider an appeal for any exam related issue, the issue must be presented via email to the instructor

who taught the content and must be submitted within 2 business days as detailed in the CSON student complain appeal policy.

4. **Failure to comply with any exam policy may result in a zero on the exam and possible dismissal from the program.**
5. **All students that earn less than an 83 on an exam or quiz will be required to meet with faculty.**

E. CSON Graduate Grading Scale:

The LMU grading system is based on a four – point scale. A grade of “B” or better is required in order to be successful in this course and to receive graduate credit at LMU.

The grading scale is as follows:

A	93-100	4.00 quality points
B+	89-92	3.33 quality points
B	83-88	3.00 quality points
C+	79-82	2.33 quality points
C	73-78	2.00 quality points
D+	69-72	1.33 quality points
D	63-68	1.00 quality points
F	Below 63	0.00 quality points

* Partial points for the final grade will be rounded to the nearest full point; for example, 88.49=88 leads to a grade of B; and 88.50=89 leads to a grade of B+.

F. Methods of Evaluation:

Exam #1	25%
Exam #2	25%
Exam #3	25%
Exam #4	25%
TOTAL PERCENTAGE	100%

Description:

Exams #1 – Exam #4 will cover material as assigned by the faculty as listed on outline.

Cumulative Testing - The practice of anesthesia is complex and involves many overlapping systems. It cannot easily be broken down into specific components. Thus, all tests in anesthesia, chemistry, physics, pharmacology, physiology, and other courses may be taken in this or another class. All tests in all courses may be cumulative of information from other courses.

No extra credit or make-up work will be offered in this class. An average of 83 is required to pass. Late work will not be accepted.

G. Camera Use Policy for Online and Hybrid Courses:

Requiring students to use cameras may be important pedagogically to increase engagement, social connection, accountability, and collaboration. Moreover, in some testing situations, cameras are essential to ensuring the integrity of the testing environment.

LMU is committed to using digital technology in ways that are sensitive to issues of student privacy. To ensure that students are aware that camera use may be required, faculty who intend to require camera use should clearly state this on each course syllabus and cover the requirement with students on the first day of class.

There may be occasions when the Instructional Continuity in Case of Temporary Campus Closure policy is enforced that leads to remote online instruction or because of faculty need for seated courses. In these circumstances, faculty may encourage but not require students to turn on their cameras for purposes other than testing unless required camera use is clearly stated on the course syllabus and covered with the students on the first day of class.

LMU is committed to providing reasonable accommodations to assist students with disabilities in reaching their academic potential. If you have a disability that may impact your performance related to the use of cameras please contact Mr. Jason Davis, Director for Accessible Education Services, to discuss your specific needs at 800-325-0900 ext. 6587. Additional information regarding accommodations is available on the [Accessible Education Services webpage](#).

H. Incomplete Policy

The incomplete policy can be found in the LMU Caylor School of Nursing Graduate Student Handbook.

A grade of Incomplete ("I") may be given in circumstances where the student has successfully completed the majority of the coursework and the instructor determines that exceptional circumstances warrant extending the time for the student to complete the work. In order to receive an "I", the student and course instructor must negotiate a contract containing a timeline specifying the date(s) by which the remaining coursework will be completed (including any practice hours), and specifying the written assignments or examinations to be completed. *The form for documenting a contract for an "I" is found in the student handbook.* It is the responsibility of the student to monitor progress towards completion of the contract to remove the Incomplete and to arrange for make-up assignments, exams, labs, or practice hours.

If a grade change request has not been submitted by the instructor by the required date, the "I" grade automatically becomes an "F" on the student's transcript.

In general, an "I" grade in any sequential nursing course must be removed by the end of the first week of the next semester in order for the student to continue enrollment in the next nursing course in the sequence. In exceptional cases where serious illness or temporary disability prevent completion of the practice component of a course, but the student is able to successfully continue with the didactic component, the student may petition the Dean to negotiate an alternative plan to complete all requirements for

removal of the “I”. Before granting such a waiver, the Dean will require a statement from the treating physician specifying that there is a reasonable expectation that the student will be able to complete the practice component and remove the “I” within the proposed timeline. An alternative would be to request a medical withdrawal.

I. Medical Withdrawal:

The didactic portions of this class provide the theoretical basis for evidence-based nursing practices applied in a clinical setting. The practical application of academic theory in a clinical setting reinforces the theoretical knowledge base needed to make evidence based clinical decisions. In order to master the academic theory and the clinical competencies that are the learning outcomes in this class, students must take the clinical and the didactic portions of the class simultaneously.

If at any time during the terms a student is unable to perform all of the student essential functions listed in the LMU-CSON handbook for a period exceeding two weeks, the appropriate course of action is to medically withdraw from the class. As an alternative to withdrawal, within two weeks of becoming unable to perform the essential student functions, a student must produce documentation from a medical provider that the student is able to perform all of the student essential functions listed in the LMU-CSON handbook.

J. Student Health Insurance and Clinical Health Requirements:

Personal Health insurance and maintaining clinical health requirements is required for all students enrolled in a NURS course. If proof of health insurance or clinical health requirements are not provided as required, the student will be withdrawn from all NURS courses

Methods of Instruction

Synchronous lecture, case discussion, and discussion of current related anesthesia research.

Information Literacy/Technological Resources

A. Bring your own device (BYOD) is a policy that allows students to bring personally owned mobile devices onto the campus to access privileged LMU resources such as email, file servers and databases as well as their personal applications and data. LMU IS department highly recommends that each student bring a personal computing device to campus with them that includes:

- High-speed (broadband) Internet connection with a minimum bandwidth of 5 Mbps upload and download speed,
- Microsoft Office (Available by contacting the Information Services Helpdesk at 423.869.7411),
- Microphone and speakers, a webcam is recommended, and
- Windows (recommended) or Mac computer with at least 8 GB of random-access memory (RAM) and 259 GB of free hard-drive space,
- Web browsers: Google Chrome and Mozilla Firefox (Install both browsers).
- In order to maintain full compliance with the LMU Network Policy, the LMU IS Department utilizes a Network Access Control Appliance (NAC). The NAC requires

each user to register each device and bring that device into compliance before being granted network access.

- **It is not recommended to complete your coursework entirely on iPads, iPhones, Android phones, Android tablets, or Chromebooks. A laptop or desktop computer is best for completing classwork in Canvas.**

B. CANVAS

Canvas will be used for this course as to post assignments, to facilitate class participation, to take exams, as a learning and evaluation tool, to post announcements, and to post and maintain individual course grades. Students must have computer skills necessary to participate in this course.

1. Grades will be posted on the Canvas grade book.
2. All course materials will be posted on Canvas.
3. The student is responsible for checking Canvas for course announcements.
4. For technical support with Canvas problems, contact the IS HelpDesk at the Main Campus (1-800-325-0900).

C. Electronic Databases

Electronic databases, accessed through the LMU library web page, should be utilized for information when preparing the required assignments for this course.

D. LMU Email Account:

Students are required and held accountable for checking their LMU email account daily and respond to faculty communication within 24 hours.

University offices, as well as faculty, will use this email address to correspond with the student throughout the semester.

E. Caylor School of Nursing General Policy on GenAI Use

Terminology & Definitions

- **Artificial Intelligence (AI):** Computer systems designed to perform tasks that typically require human intelligence (AI for Education, 2025; as cited in [LMU CTLE](#), 2025).
- **Generative AI (Gen AI):** A type of AI that creates new content, like text, images, or music, based on the patterns it has learned from existing data. It functions as a sophisticated prediction system that analyzes prompts to generate the most appropriate response ([Claude Sonnet 3.5 & LMU CTLE](#), 2025).

Policy Hierarchy and Applicability:

In the event of a conflict between policies, the following hierarchy applies:

- The University Catalog governs university-wide academic integrity expectations.
- This Student Handbook provides school-specific GenAI guidance.
- Course Syllabi dictate specific restrictions or permissions for individual assignments.

1. Baseline Expectations

Unless explicitly stated otherwise by your course faculty, Gen AI is treated similarly to receiving assistance from another person.

- Students **must not** use Gen AI tools to substantially complete an assignment or exam.
- Course instructors have the final discretion to permit or prohibit specific uses of Gen AI.
- **When in doubt:** Always ask your instructor for clarification before using any tool.

2. Strict Prohibitions

The following actions are strictly **prohibited** across the Caylor School of Nursing

- **Patient & Student Data (HIPAA/FERPA):** You must never enter HIPAA-protected patient information or FERPA-protected student data into GenAI tools.
- **Clinical Assignments:** All GenAI use is **prohibited** during clinical assignments. These components require the development of independent clinical judgment and accurate synthesis of patient data without reliance on AI-generated output.
- **Unauthorized Assignment Completion:** Generating substantive written content, clinical reasoning, or analyses to submit as your own work is prohibited unless explicitly authorized by the instructor.

3. Instructor-Permitted AI Use & Disclosure Requirements

If your course faculty explicitly approves the use of Gen AI for an assignment, you are required to disclose exactly how it was used. Permitted use may never replace independent thinking or professional judgment.

How to Disclose:

When permitted, students must include a formal disclosure statement **placed at the very end of the document, immediately following the reference list.**

Required Disclosure Template:

Students should copy, paste, and fill out the following template for their disclosure statement:

GenAI Use Disclosure

- **Tool(s) Used:** [e.g., Microsoft Copilot, Grammarly GO, ChatGPT]
- **Nature of Use:** [e.g., Brainstorming, outlining, grammar assistance]
- **Prompts Entered:** [If used for substantive idea generation or drafting, paste the exact prompts you used here. If only used for grammar/spelling, write "N/A - Grammar only"]
- **Statement of Originality:** I confirm that all AI-generated suggestions were reviewed, and the final submitted work is my own original composition. No protected patient or student data was entered into this tool.

Example of an Acceptable Disclosure Statement:

"GenAI Use Disclosure: For this assignment, I used Microsoft Copilot for idea generation only. Prompt used: Provide three non-clinical examples of public health

interventions appropriate for rural communities.’ I reviewed the generated ideas but wrote all content in this paper myself. No AI generated sentences were used in the final submission. The final submitted work is my own original composition.”

4. Citing GenAI as a Source

If you directly quote or paraphrase information generated by an AI tool, it must be cited in standard APA format.

Example:

When prompted with “Is the left brain right brain divide real or a metaphor?” the ChatGPT-generated text indicated that although the two brain hemispheres are somewhat specialized, “the notation that people can be characterized as ‘left-brained’ or ‘right-brained’ is considered to be an oversimplification and a popular myth” (OpenAI, 2023).

Reference

OpenAI. (2023). *ChatGPT* (Mar 14 version) [Large language Model]. <https://chat.openai.com/chat>

(McAdoo, 2025)

5. Student Accountability

- **Hallucinations:** Because these systems predict the next word based on patterns, they frequently present incorrect information as fact. You must always verify AI-generated output.
- **Responsibility:** You are responsible for the accuracy, integrity, and originality of all submitted work. Errors or inappropriate content generated through AI tools remain your responsibility.
- **Verification:** Faculty reserve the right to request clarification or explanation of submitted work to verify student understanding and authorship.

6. Student Resources

Students should refer to the **Caylor School of Nursing Student Decision Tree** to help guide their understanding of when Gen AI use is appropriate and how to make ethical decisions regarding its use.

(Caylor School of Nursing GenAI Task Force, 2026)

Blog. <https://apastyle.apa.org/blog/how-to-cite-chatgpt>

GenAI Use Disclosure: *Microsoft Copilot, NotebookLM, and ChatGPT were used to support the formatting, organization, and refinement of wording during the development of this policy. All AI-assisted suggestions were reviewed, edited, and approved by the Caylor School of Nursing AI Task Force. The final policy language and framework represent the original work and professional judgment of the Task Force. No protected or sensitive data were entered into any AI tool.*

GenAI Use Disclosure for Image: *The Caylor School of Nursing GenAI Task Force used a Gen AI tool to assist in creating the visual decision-tree image accompanying this policy. Prompt used: "Create a student-friendly decision tree illustrating when Gen AI use is permitted or prohibited in nursing coursework based on institutional policy." The generated output was reviewed, edited, and finalized by the task force. No patient, student, or protected data were entered into the AI tool. The conceptual workflow and final decision points remain the original intellectual property of the Task Force.*

Course Outline/Assignments/Units of Instruction or Clinic Schedule

Date	Topic	Assigned Reading /Projects
8/17/2026 Roberts	- Review Syllabus (in class) - Introduction to Anesthetic Pharmacology - General Principles of Drug Actions	- Pharmacology & Physiology Chapters 1 & 2 - Nurse Anesthesia Chapters 5 & 6 - Valley / Prodigy Pages 235-249
8/24/2026 Todd	History and Types of Anesthesia	- Pharmacology & Physiology Chapters 4 & 5 - Nurse Anesthesia Chapters 7-8
8/31/2026 Roberts	Induction and Sedation Agents	- Pharmacology & Physiology Chapters 4 & 5 - Nurse Anesthesia Chapter 9 - Valley / Prodigy Pages 274-277

12/7/2026	Exam 4 Covering • Local Anesthetics • Sympathomimetics • Sympatholytic • Antiarrhythmic drugs	

Important Dates in the Academic Calendar Fall 2026

Event	Date(s)
Classes Begin	August 17
Last Day to Add Classes	August 26
Labor Day holiday (no classes)	September 7
Last Day to Drop Course without "WD"	September 18
Midterm Exams	October 5-9
Last Day to Drop Course without "F"	October 23
Fall Break (no classes)	October 22-23
Early registration begins	October 26
Thanksgiving holiday (no classes)	November 25-27
Last Day of Classes	December 4
Final Exams	December 7-11
Commencement (10 a.m.)	December 12

Information for All Courses and Programs

University Services

Academic Support Services

The [Tagge Center for Academic Success](#) offers tutoring options, study skills sites, student support services, writing support, and the Cornerstone Program.

Counseling and Accessibility

Counselors are available to help students with personal, career, and academic concerns that affect academic success and quality of life. The Executive Director for Counseling and Accessibility, Dr. Jason Kishpaugh, can be contacted at jason.kishpaugh@lmunet.edu and/or 423.869.6277 (800-325-0900 ext. 6277).

University Policies

Graduate Attendance

To maximize the learning experience at Lincoln Memorial University, students are expected to attend all classes. All absences, excused or unexcused, must be brought to the attention of the instructor as soon as possible. All missed coursework, tests/assignments/information/clinical activities, are the student's responsibility. LMU's institutional Attendance Policy (including a list of excused absences) is published in the [Academic Catalog](#).

Unofficial Withdrawals

Any student who ceases attending classes before the end of the semester, or summer term, without completing an official withdrawal from the University automatically receives the grade of “F” for such course(s), so noted on the student’s academic transcript, and may be administratively withdrawn. LMU’s institutional policy on Unofficial Withdrawals is published in the [Academic Catalog](#).

Administrative Withdrawals

Students who have not attended courses by the ninth-class meeting of the semester (or equivalent for summer terms) will be reported to the Registrar’s Office, Financial Aid, and the Tagge Center for Academic Success and may be administratively withdrawn with a WD recorded on the transcript for each course. Students who cease attending classes prior to the end of the semester, mini-term, or summer term without completing the official withdrawal from the University may also be administratively withdrawn, with an F recorded on the transcript for each course. (See “Unofficial Withdrawal.”)

Distance Education Policies (located on LMU Policies [webpage](#))

The following policies are in place for students in distance education (online) courses or programs.

[Verification of Identity](#)

[Protection of Student Privacy](#)

[Notification of Additional Charges Associated with Student Identity Verification](#)

Students With Disabilities Policy

LMU is committed to providing reasonable accommodations to assist students with disabilities in reaching their academic potential. If you have a disability that may impact your performance, attendance, or grades in this course, please contact Mr. Jason Davis, Director for Accessible Education Services, to discuss your specific needs at jason.davis@lmunet.edu and/or 423.869.6587 (800-325-0900 ext. 6587). Additional information regarding accommodations is available on the [Accessible Education Services webpage](#).

Please Note: The Department of Accessible Education Services strives for prompt communication. If you have not heard back from us in 5 business days from the date of this email, please email our department again.

Discrimination and Academic Integrity

Policies can be found in the [Railsplitter Community Standards Guide](#) and [Academic Catalog](#).

Note: some graduate/professional programs have program-specific Academic Integrity policies that students in those programs are required to follow.

Harassment, Discrimination, and Sexual Misconduct

Lincoln Memorial University prohibits discrimination on the basis of race, color, ethnicity, religion, sex, national origin, age, ancestry, disability, veteran status, sexual orientation, marital status, parental status, gender, gender identity, gender expression, and genetic information in all University programs and activities. The [LMU policies on harassment, discrimination, and sexual misconduct](#) are located in the [Railsplitter Community Standards Guide](#) and through the [Office of Institutional Compliance](#).

All LMU employees, except counselors in the LMU Office of Mental Health Counseling in the course of providing clinical counseling, are Mandatory Reporters for sexual harassment on campus. This means that if you inform any LMU employee of a situation that may involve sexual misconduct, including sexual harassment, sexual assault, stalking, domestic violence, dating violence, or any other form of prohibited gender or sex-based discrimination, the employee is required to report the information to the Title IX Coordinator.

If you have experienced discrimination and would like to make a report to the University or discuss your options for support from the University, contact:

Ms. Rebekah Webb, M.Ed., Title IX Coordinator & Institutional Compliance Officer
Phone: (423) 869-6315 or Email: rebekah.webb@lmunet.edu or TitleIX@LMU.net
Office: LMU Cumberland Gap Offices #3 (next-door to the Lincoln's Closet) | Duncan School of Law 249 (Knoxville) | Meet by Appointment on any LMU campus or via Zoom.

Hazing

Hazing is strictly prohibited by the University and the State of Tennessee. Additional information on LMU's policy on hazing is published in the [Railsplitter Community Standards Guide](#).

Course Evaluations

In addition to meeting degree requirements specified in the graduate and undergraduate catalogs, all students are required to complete University-administered course evaluations.

Outcomes Assessment Testing

Degree requirements include participating in all outcomes assessment testing (e.g., general education assessment, major field tests, etc.) and activities when requested. Students may be required to complete one or more questionnaires and to take one or more standardized tests to determine general educational achievement as a prerequisite to graduation (see appropriate catalog for additional information). More information is available on [LMU's Assessment webpage](#).

Inclement Weather

In the event of inclement weather, students should check their LMU email during delays/closures to receive information from individual faculty regarding potential assignments and/or other course information.

Instructional Continuity in Case of Temporary Campus Closure Policy

Faculty and students should expect scheduled instruction to continue even if class meetings are canceled due to weather, epidemic illness, or other factors. Students will be required to complete alternate instructional activities online as directed by the course instructor.

Mission Statement

Lincoln Memorial University's Mission Statement is located on the [Heritage and Mission webpage](#).

Student Community Engagement

A cornerstone of the University's mission is service to humanity. For more information visit [LMU's Leadership and Outreach webpage](#) or contact Assistant Dean of Students Sheri Schatz at sheri.schatz@lmunet.edu.

Originality Checking Tools

Students agree that by continued enrollment in this course that all required papers may be subject to submission for textual similarity review to third-party tools for the detection of plagiarism.

The instructor reserves the right to revise, alter, and/or amend this syllabus, as necessary. Students will be notified in writing and/or by email of any such revision, alterations, and/or amendments.
